MAIGIA OS

Your voice.
The whole experience.

A revolutionary AI-driven audiovisual control system.

Lighting, sound, video and any other connected system, controlled by voice commands.

Powered by AI. Directed by you.

WATCH THE DEMO

AI at the controls

Speak naturally.
AI turns your words into action.

MAIGIA OS uses artificial intelligence to interpret voice commands and coordinate lighting, sound, video and other connected systems.

Voice commands

Artificial intelligence

Connected systems

One voice. Control across the experience

Lighting

Set the mood and trigger cues.

Sound

Control playback and audio cues.

Video

Open media and direct visual content.

Other connected systems

Extend control through integrations.

AI translates your voice into actions
for the systems in your project.

Places, projects and stories

Portfolio navigation

Choose a location.
Open its photographs.
Play the relevant video.

Voice navigation through the Girasomnis portfolio.

Product exploration by voice

The presentation follows the conversation.

Details on demand

Show the interior or
focus on a feature,
using voice commands.

AI understands the active context

A question.
A relevant response.

Ask for an explanation or request the content you want to explore.

AI combines the active section with information prepared for your project.

Context helps AI interpret what you mean and choose the next action.

Your content. Your connected systems.

01 Experience

Define your story and
the atmosphere you want to create.

02 Systems

Connect lighting, sound, video
and the other systems in your project.

03 Voice actions

Prepare the commands, content
and cues that AI will control.

04 Rehearsal

Test the experience with the presenter
and the technical team.

Creative direction by Girasomnis Creative Studio.

Voice control for live experiences

Events and keynotes

Coordinate content and audiovisual cues.

Stands and showrooms

Explore products through conversation.

Tourism and destinations

Navigate places and local stories.

Museums and visitor centres

Adapt the narrative and the atmosphere.

Lighting. Sound. Video.
One voice to direct the experience.

We configure and rehearse the content and system integrations for each project.

MAIGIA OS

Let your voice run the experience.

Discover MAIGIA OS with your content and connected systems.
